## AMMONIA DETOX

Neutralise harmful ammonia up to 72 hours  
 Binds chloramines and chlorine in tap water  
 Acts immediately

Fast and effective way to eliminate ammonia, chlorine, chloramine from water, making water safe to use and prolong the water changes interval without the risk of ammonia poisoning.

**120ml, 250ml, 500ml**

## OPTIMAL

Removes chloramines, chlorine from tap water

Binds to harmful ammonia  
 Super concentrated formula

OPTIMAL is a super concentrated water conditioner for tap water. It is a ready to use powder and reacts instantly, turning tap water to "fish-safe" water.

**220g, 440g, 900g**

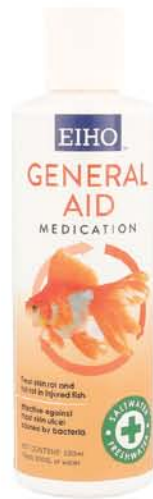

## AQUA GH

Replenish GH for DI/RO or soft water  
 Replace natural minerals (calcium, magnesium, potassium)

Brings out natural colour and behavior for soft water fish.

An aquarium environment is often low in minerals, and this will affect newly introduced fishes from the natural environment, causing stress for the fishes.

**120ml, 250ml, 500ml**

---

## GENERAL AID

---

Treat skin rot and tail rot in injured fish  
Effective against most skin ulcer caused by bacteria  
Formulated with two strong anti-bacteria medication that is highly effective in combating common skin bacteria. At the same time, it will not stress out the fishes. It is highly suitable for goldfish, koi, cichlid and arowana.

**120ml, 250ml, 500ml**

---

## FURAN PLUS

---

Treat external bacteria & fungal infections caused by Columnaris and Aeromonas  
Fast acting formulation  
Excellent treatment against both gram-negative and gram-positive bacterial infections. It contains Nitrofurazone as the active agent, which is effective and fast-acting. It is effective in both freshwater and saltwater.

**60g, 850g**

---

## KANA PLUS

---

Treats bacteria and fungus infections  
Treats dropsy, septicemia, fin, tail, body rot  
Kana plus is easily absorbed through skin and gills, and does not need to be ingested to be effective. Thus, it is an excellent treatment for internal bacteria infection and targeted treatment for fishes that has lost appetite. Suitable for freshwater and marine aquarium.

**60g, 850g**

---

## ANTI FUNGUS & FINROT

---

Treatment for fin rot, mouth rot, skin rot  
Effective against bacteria and fungus  
infection

These infections are commonly caused by  
Aeromonas, Psuedomonas, Columnaris and  
Flexibacter. These bacteria may spread to  
other fishes in the community tank and  
may cause huge losses if left untreated. It is  
effective for tropical fish, goldfish, discus, koi

**120ml, 250ml, 500ml**

---

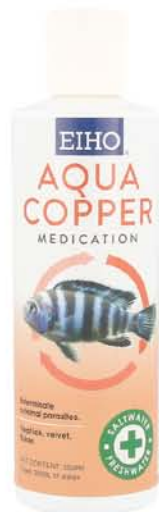

## ANTI WHITE SPOT

---

Cures white spot disease

Formulated to eliminate freshwater white  
spot (Ichthyophthirius sp.). Suitable for fresh-  
water and saltwater fishes.

**120ml, 250ml, 500ml**

---

## AQUA COPPER

---

Exterminate external parasites.

Treat ich, velvet, flukes

Most fish carry a small amount of external  
parasites. When fish are stressed or environ-  
mental conditions are poor, these parasites  
can in turn flourish, and affect the fish.

AQUA COPPER contains chelated copper  
which will provide fast treatment against  
these parasites.

**120ml, 250ml, 500ml**

---

## AQUA BLUE

---

Treats common gills & skin diseases  
First treatment for goldfish against infections

This unique formulation combats both bacteria and parasites, without creating too much stress on the fish. It acts as the first treatment against infection after transportation. Suitable for goldfish, koi, tropical fish, cichlid and arowana.

**120ml, 250ml, 500ml**

---

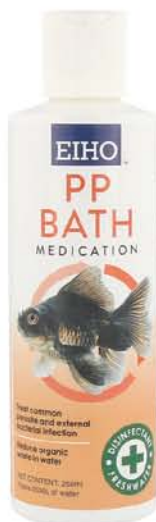

## METHYLENE BLUE

---

Traditional treatment against various diseases  
Excellent treatment for fungus infection

An effective treatment for common protozoan parasite and fungus in fish. It is commonly used in hatcheries specially for discus breeders to reduce incidence bacterial and fungus infection.

**120ml, 250ml, 500ml**

---

## PP BATH

---

Treat common parasite and external bacterial infection. Reduce organic waste in water

Used as a disinfectant to combat against common skin and gills parasites such as Trichodina, Costia, Chilodonella, bacteria and fungus. Used as a preventive treatment to reduce chances of infection that causes ulcer and redness on skin.

**120ml, 250ml, 500ml**

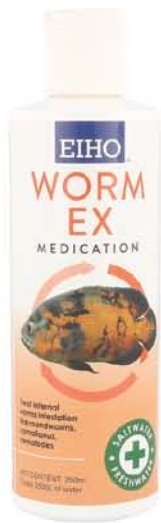

---

## PRAZI GOLD

---

Treatment for internal and external parasites like flukes, tapeworm, flatworm  
Safe for scaleless fishes and plants.  
These parasites are most common in imported or fishes caught in the wild, as well as fishes fed with live food. Easy to use liquid and provides effective and fast treatment. The formulation is non-toxic to both fishes and plants.

**120ml, 250ml, 500ml**

---

## WORM EX

---

Treat internal worms infestation like roundworms, camallanus, nematodes.

These worms, such as roundworms, may be present in fishes caught in the wild, as well as fishes fed with live food. Worm EX contains a strong, fast-action anti-worm agent. It is safe for scaleless fish.

**120ml, 250ml, 500ml**

---

## METRO CURE

---

Treat hole in the head and bloated stomach  
Treat marine whitespot and internal bacteria infection  
Treat white feces and early dropsy.

Effective to combat disease caused by intestinal flagellates (heamita, spironucleus) and marine whitespot.

**100 tabs**

---

## ANTI LICE

---

Eliminate fish lice and anchor worms  
Fast acting within 24hours

Anti Lice is highly effective for usage on koi, goldfish, arowana and tropical fishes. It is used in freshwater and pond environments.

**120ml, 250ml, 500ml**
